For D.C.s, L.Acs, M.Ds, NDs, PTs, LMTs, etc.

"I've been inundated with countless chiropractic techniques over the 40 years I've been practicing, but I'm spectacularly impressed with the results I got yesterday when I was treated at the PNT class. I had chronic bilateral TMJ pain for the past 10 years. **I had immediate, 100% improvement in TMJ tension and pain elimination with the Advanced Mandibular Reflex 2.0 Protocol.**

"The tinnitus I've had for 30 years is dramatically better. It's 75% improved in my left ear.

"In 2000, I crashed my bicycle riding on a dirt road. I was traveling about 17 mph and landed on my face. My left side hit very hard. I had 4 rib fractures, lots of neck pain which was present to this day, despite of years of self-care. The neck pain was 65% improved with one treatment in the PNT class today!

"During class I was treated for several cervical vertebral facet pain areas. Each area was immediately fully relieved of pain, resulting in a rather dramatic improvement in my overall energy level. I felt like my body was waking up from a long "pain nap". I was pain-free and energized." **Steven Smith, D.C. Stevensville, Mon.**

"Yesterday Dr Kaufman did the Inferior Cervical Sympathetic Ganglion Technique (from the Sympathetic Protocols) for the weakness in both my arms. My arms cramp up so much after I treat people. I've been a chiropractor for 35 years and lately every day I think I have to retire because I can't keep on doing this. My arms start hurting so much. I had feelings of cold in both my arms and also pain after using them.

"Immediately something happened during treatment. Today my arms are freer for the first time, and they're warmer. My hands are also much warmer." **Update 1 year later: Since treatment at the seminar, my arms have much improved!!!** **Adrian (DJA) Jasperse, D.C. Netherlands**

"In 2003 I had a total hysterectomy after being diagnosed with a large mass on my right ovary and grapefruit sized uterine fibroid tumor. Since the surgery I've had marked pain and tenderness in my abdomen. After Dr. Kaufman treated my abdomen my tender areas disappeared! My abdomen sized decreased! I had also suffered from constipation, after the treatment, that night I had 3 bowel movements!! This has been an emotional subject for me because when the surgeon made the incision, the mass ruptured and I could have died."

Helen M. Branch, L.M.T. Sequin, Texas

"One of my patients had vertigo that started in February, 2012. I got her mostly settled down with what I knew from the vertigo technique, but she has not been able to fully turn her head to the right without initiating the vertigo. I did the new Vertigo/Upper Cervical Correction and she was immediately able to fully turn her head in right rotation with absolutely no vertigo!!! She cried, I cried, and everyone in the clinic knew what we had done. Everyone cheered, and two people cried with us... It was amazing!!!!" **Kathi Perry, D.C. Spring, TX.**

"I had a very traumatic bike crash in 2010 (8 years ago). I suffered a compartment syndrome in my legs, and also had 3 dental implants (at both incisors and the right bicuspid). I've had a severe, unrelenting, dull ache since the implants.

"The pain from the dental implants decreased significantly after treatment with the Dental/ Brain Reflex. I was told the pain following my dental implants would never go away. It's now gone after having the Dental Brain Reflexes.

"My legs had remained swollen from the compartment syndrome since the crash in 2010. **I was treated with the Anti Inflammation Circulatory Techniques, and the Pec Minor Circulatory Technique.** I woke up today, the day after treatment, and my legs were significantly less swollen. The inflammation had decreased. I also got a huge endorphin rush from the treatment." **Eileen Steil, LMT. Atlanta, GA**
